WORK EXPERIENCE

JohnHumbracht.com Web Services

Front End Web Developer

2012 - Present

My primary focus is building custom, from scratch, responsive websites & single-page web apps for a wide range of businesses

- Every website is fully responsive, cross-browser, and cross-device compatible
- Extreme care is given to insure each and every project is designed with usability in mind
- Excellent understanding of what creates a positive user experience (UX)
- Projects meet Americans with Disabilities Act Compliance standards
- Commonly use Wordpress as a Content Management System for custom projects but also have experience using many of today's other popular CMS platforms & website builders such as Joomla, Drupal, and Squarespace
- In addition to custom site development, clients are offered:
 - Search Engine Optimization, Inbound Marketing, Social Media Consulting, Branding & Custom Graphics
 - Plus whatever else the client needs to achieve the best results

- Love of learning new skills

ABOUT ME

I am a front end developer with over 8 years of experience building custom, responsive websites and web apps for a wide variety of clients. I have also taught front end languages and design concepts for close to 6 years. I love solving problems and creating things. I am currently looking for new challenges and new opportunities in the field of development. My dream job is one that capitalizes on my existing expertise on the front-end while encouraging me to continue growing as a full stack developer.

General Assembly

HTML, CSS, Web Design Instructor

2014 - Present

I teach an online course that covers the fundamentals of front end websites. Topics include responsive UX/UI design & best practices, HTML5, CSS3, & HTML emails. Though it is not specifically part of my job description I often find myself teaching Javascript/JQuery, SEO, and inbound marketing too.

- Have received the "Distinguished Faculty" designation every year since the award was created
- Consistently receive student feedback that places me in the highest percentiles of instructors company wide
- Wrote much of the curriculum that has been used to successfully teach over 2,250 students the fundamental concepts of Web design and browser side languages such as HTML5 and CSS3.
- Have personally mentored over 1500 students

- Wordpress, Joomla, Drupal, and Squarespace
- Inbound Marketing
- Branding
- MySQL
- MongoDB & Mongoose
- Progressive Web Apps & Services Workers
- CPanel, Plesk, & AWS Servers
- Adobe Creative Suite
